Summary

Its an exciting time to be a web developer, the ebb and flow of design trends are ... flowing and changing exponentially it would seem. Luckily, keeping up is made easier by all the fresh new web apps and frameworks available to development folks. Cloud development sites like <https://kodingen.com/> seems to be the direction things are going in. I want to continue to improve my coding and programing skills so that i can shift more time and focus onto creating better looking sites and sweeter UI's.

Specialties

website prototyping markup and styling

Experience

Web Developer at Chattanooga Times Free Press

August 2010 - Present (1 year 7 months)

Develop new online products as directed by Online Director to meet market opportunities with content solutions that target specific website users in a timely manner.

Proactively gather and understand criteria for new projects

Sets realistic timeline for solutions account for tasks to be done from other team members, departments, or vendors and delivers solution on time

Graphic Artist at Super PC / Multi-monitors

June 2009 - January 2011 (1 year 8 months)

Flash banner ads to promote Super PC and their clientel as well as some other various web graphics.

Above ground pool installer at Watsons Pools and Service

2000 - 2003 (3 years)

Worked primarily for a Watsons sub-contractor named Ben Beamen. He had a decked out crew cab f-3million super duty rig with tinted windows.. awesome times. We would pull a bobcat to someones backyard and dig a round hole. My duties were to do the labor intensive stuff while the bossman sat in the bobcat giving orders. I must have installed over 500 above ground pools. Later I started sub-contracting for watsons doing liner changes mostly.
